Dung Nguyen (Jasmine)

Frontend Engineer

0398060569 | dungntp.contact@gmail.com | dungime.github.io/jasmine-portfolio | Ho Chi Minh City

SUMMARY

Senior Frontend Developer with **10+ years** of experience building and delivering production web applications across fintech, e-commerce, admin dashboards, e-learning, and event ticketing.
Specialized in **React, TypeScript, and Next.js** — **independently owning** complex products, making frontend architecture decisions, and taking frontend features from development through production release.
Experienced in collaborating with Design, Backend, and QA teams, mentoring fresher developers, and maintaining code quality through code reviews and frontend best practices.

SKILLS

Core Front-end: **ReactJS, NextJS, TypeScript, JavaScript (ES6+), HTML5, CSS3.**

State & Data: React Query, SWR, Jotai, Redux, Rematch.

UI & Styling: Ant Design, Material UI, Tailwind CSS, SCSS, CSS Modules, Styled-components, Bootstrap, Storybook.

Tooling: Vite, Turborepo, Git, Webpack.

Additional Experience: React Native, AngularJS 2, jQuery, Shopify Liquid.

EXPERIENCE

Nexstox

May 2025 – May 2026

Senior Frontend Developer - Sole FE for first 3 months

- Started as the **sole frontend developer for the first 3 months**, taking ownership of frontend development and delivery.
- Built and maintained features across NexStox and NXMarket.
- Developed complex **trading, staking, KYC, and admin workflows.**
- Contributed to **frontend architecture, reusable components, and API integrations.**

React · TypeScript · Next.js · Redux Toolkit · Material UI · REST APIs · Real-time Data

Lecle VietNam Jsc.

March 2019 – May 2025

Senior Frontend Developer

- Delivered **30+ projects** across e-commerce, e-learning, ERP, admin dashboards, and Shopify.
- Configured projects from scratch and **made frontend technology and architecture decisions.**
- Built **complex data-driven interfaces**, including interactive calendars, tables, charts, and create/edit forms, for an admin dashboard managing cleaning service operations.
- Built the core user-learning features, including a video player, slide/book mode, subtitles, chapters, page navigation, and bookmarking.
- Took ownership of the frontend for an Odoo-based e-learning platform, handling all frontend development.
- **Mentored 5 fresher frontend developers** and contributed to code reviews and onboarding.

Pure Projects Co. Ltd.

Jan 2018 – Oct 2018

Frontend Developer

- Built production features using **HTML, CSS, and Vanilla JavaScript.**
- Implemented API-driven features with **pagination, filtering, and editing forms.**
- **Worked closely with QA** throughout development and release to ensure quality.

HTML5 · CSS3 · JavaScript (ES5 + ES6) · Bootstrap · REST APIs

TicketBox Co. Ltd.

May 2016 – Dec 2017

Frontend Developer

- Collaborate with design and business teams to ship **6+ event landing pages.**
- Built an event detail page with modern UI and scrolling animations.
- Developed event pages and ticket booking experiences using Angular, CSS3, Vanilla JavaScript, and jQuery.
- Worked with Design, Backend, Mobile, and Business teams in an **Agile environment.**

HTML5 · CSS3 · JavaScript (ES5) · jQuery · AngularJS 2 · Bootstrap · REST APIs

KEY PROJECTS

NexStox & NXMarket Trading Platforms

Sole Frontend Developer for two fintech platforms for the first 3 months.

- Developed and delivered **staking features** covering staking rules, single and compound staking rewards, staking, unstaking, stake-more, and penalty flows.
- Built **Launchpad features** for displaying project information and handling Launchpad purchases.
- Developed a **new platform based on the existing product**, adapting core functionality for the new platform.
- Implemented the new UI, sign-up flow, and KYC flows.
- Implemented **multilingual interfaces** to support multiple languages across the platform.
- Resolved critical issues in the new exchange interface and improved the stability of key trading workflows.
- Independently reviewed product documentation, UI designs, and API documentation to understand requirements and implement features, while clarifying requirements with the team when needed.

React · TypeScript · Material UI · REST APIs · Real-time Data

E-Learning Platform

- Set up the **entire monorepo architecture from scratch** for the platform.
- Built the student learning experience with a **video player, book mode, subtitles, chapters, pages, and bookmarking**.
- Developed real-time notification features, including **notification interactions and comments**.
- Built a real-time commenting system supporting **comments, likes, and one-level teacher replies**.
- Integrated REST APIs and real-time data flows to keep learning and social interactions synchronized.

React · TypeScript · Next.js · Ant Design · Jotai · REST APIs · Real-time Data

Cleaning Services Admin Dashboard

- Set up the **entire architecture from scratch**.
- Developed end-to-end CRUD workflows for **cleaning requests, maintenance, reports, and inventory**.
- Built complex data-driven interfaces combining **interactive calendars, tables, charts, drawers, and tree views**.
- Developed **complex creation forms** for managing operational workflows and business data.

React · TypeScript · Ant Design · Jotai · Vite · Turborepo · REST APIs
